### SUMMARY

As an engineer, with many years of experience, I am seeking to push my passion for coding and problem-solving further. I am driven and passionate about learning and strive to seek solutions to challenging problems with resilience and agility. My strengths include analytical thinking and research-based learning to drive results. With an international mindset and the ability to break down barriers, I have cultivated a collaborative and adaptable approach to work.

---

### WEB DEVELOPMENT PROJECTS

#### **Bergin Tours**

- A travel website for a family business. Customers can book their next trip and pay with stripe. They can make a review, save their favorite blog post and chat with a travel agent directly. Built with Ruby on Rails, JavaScript, HTML5, CSS/SCSS, Bootstrap, SQL, and Heroku.

#### **Second Handy**

- Airbnb marketplace for buying and selling second-hand NBA jerseys. Built with Ruby on Rails, JavaScript, HTML5, CSS/SCSS, Bootstrap, SQL, and Heroku.
-
